

eq=
\LARGE
\[日本語

E\,=\,M\,C^2
\]
$$E = M C^2$$

- (1) ***Make sure you are running tgif-4.1.11 or newer. You can find out what version of tgif you are running by selecting About() from the Special menu.***
- (2) ***This version of the LaTeX equation symbol uses ghostscript's "ps2epsi" to add a preview bitmap to a PS file. If want to use "pstoepsi", please use "eq4.sym" instead. Information about "pstoepsi" can be obtained from <URL:http://bourbon.cs.umd.edu:8001/tgif/tools.html>.***
- (3) ***Make sure that latex, dvips, and ps2epsi are in your PATH. After you instantiate this symbol, double-click it to run the latex scripts. Afterwards, you can hide/show the eq= attribute by pressing <Alt><Ctrl>7.***
